## WORK EXPERIENCE

### Zignuts Technolab - Gandhinagar

Jan 2024 - Present

- As a web developer and Mobile, I've contributed to industry-level projects across diverse domains, including insurance platforms, CRM systems, and environmental technology solutions.
- Collaborated with a team, shared ideas, and learned new skills through teamwork

## PROJECTS

### AI Career Coach Platform

- Built an AI-powered platform that provides personalized career guidance, interview preparation, and resume generation.
- Users receive role-specific mock interviews, real-time industry insights, and ATS-optimized documents based on their skills and experience. Designed for 50+ industries with a success rate of 95%.

### Smart Scheduling & Availability Management

- Developed a smart scheduling platform that allows users to create events, set their availability, and share personalized booking links.
- Schedulrr automates appointment management and streamlines workflows for professionals, freelancers, and teams, improving meeting efficiency and user convenience.

### PlayPulse – AI Sports Content Generation Dashboard

- Built an interactive front-end dashboard for an AI-powered sports marketing platform that enables real-time content overview and generation
- Implemented scalable UI components to manage live sports data, automate in-play content creation, and deliver personalized marketing insights using SurfaceAI across 800+ leagues.

### PlayPulse Mobile – Sports Event & Notification App

- Developed a React Native app for real-time sports updates, showing country-wise leagues, match previews, detailed match content, and AI-generated insights
- Integrated Expo Push Notifications to deliver timely alerts for sports events, enhancing user engagement through personalized content and live updates.

### Personal Portfolio Website

( <https://nvaibhav.netlify.com> )

- Built a blog using Next.js and Prisma with MongoDB integration.
- Added Next.js 15 features like caching, data fetching, ISR and server-side rendering.
- Created a dashboard with visual charts and CRUD management.

### SmartSpend – React Native Expense Tracker App

- Built a mobile expense tracking app using React Native and Expo to help users manage daily spending
- Features include adding, editing, and deleting transactions, viewing category-wise expense summaries, and real-time analytics with visually appealing charts..
- Designed with a clean UI and responsive layout for seamless user experience across devices.

## SUMMARY

- Front-End Developer with experience of 2+ years in creating responsive, accessible, and scalable web applications with React.js, JavaScript (ES6+), TypeScript, and new-generation CSS frameworks such as Tailwind and SCSS.
- Proficient in working with UX/UI designers to implement mockups into high-performance user interfaces, with hands-on experience in integrating RESTful APIs and state management using Redux.
- Enthusiastic about clean code, performance optimization, and keeping current with contemporary development methodologies such as Git, CI/CD, testing (React Testing Library), and Agile processes.

## CONSULTING EXPERIENCE

- Full Stack Developer - jul2023 –Dec2023**  
Parmar Hospital Website – Developed a modern, responsive hospital website with appointment section and service showcase. Focused on performance, accessibility, and clean UI.
- Import-Export Business Website – Built a business-oriented site for an import-export company featuring product listings, inquiry form, and responsive design.
